## Objective

---

A fast learner and enthusiastic university student. Passionate about software development and databases. Enthusiast about creating efficient applications and discord bots. Looking to expand my skill set by contributing to a growth-oriented company.

## Education

---

**University of British Columbia**

**Sept 2018 – April 2023**

*Bachelor of Science in Computer Science*

*Kelowna, BC, Canada*

## Experience

---

**Code Ninjas - Co-op**

**January 2022 - Present**

*Senior Coding Instructor*

*Kelowna, BC, Canada*

- Taught JavaScript, Python, Scratch, MakeCode and making mods in Minecraft to kids between the age of 7-14.
- Provide technical advice to the center director and setup technical devices in the center.

**Campus Wellness and Education - UBCO**

**September 2021 – December 2021**

*Undergraduate Academic Assistant*

*Kelowna, BC, Canada*

- Worked with a team to build strategies to promote mental health and wellness among peers by events and social media.
- Used Microsoft teams to communicate and Canva for creation of social media posts. Redesign Canva Shell with HTML.

**PathVisor**

**June 2020 – July 2021**

*Co-Founder and Marketing Assistant*

*Gujarat, India*

- Co-Founded and worked as a part-time marketing assistant at PathVisor, an organization to assist students with college applications and essays. Develop and upload Instagram posts using Canva.
- Engage and schedule meeting with potential customers.

## Volunteer

---

*Baroda Citizen's Council*

*Gujarat, India*

## Projects

---

**JobScraper - Indeed | Kelowna, BC, Canada**

**December 2021**

- Utilized Python library - BeautifulSoup to scrape different job title and their description/qualifications from Indeed.
- Utilized Python libraries - nltk, scikit-learn, pandas, seaborn, word cloud to perform data analysis and represent data using visualization.
- Scraped different job's qualifications/requirements to find similarity between each job based on hard skills.

**LordGaben | Kelowna, BC, Canada**

**July 2021**

- Created a discord bot using Python, Replit and Replit database to find lowest market price of items on steam market.
- Created an API Script to find the lowest price of an item on steam market.

**IMDBot - Movie Chat Bot | Kelowna, BC, Canada**

**December 2020**

- Incorporated python library – IMDB to create a bot to find details about movies, actors, directors and others.
- Utilized Trello as a project management tool and GitHub for version control. Incorporated unit testing.

**Video Game Sales Analysis | Kelowna, BC, Canada**

**November 2020**

- Utilized Tableau and Python Libraries - Seaborn and Pandas to create data visualizations and perform data analysis.
- Extrapolated a relationship between the number of games published by a gaming studio and their recorded sales numbers, and the factors that affect it.
